

Daylight Savings Time 2007 NEC Product Support Announcement

In August of 2005, the United States Congress passed the Energy Policy Act. A provision of this new law will change the dates that Daylight Savings Time (DST) goes into effect in 2007. The new start date for DST is the second Sunday in March at 2:00am and the new end date for DST is the first Sunday in November at 2:00am.

Daylight Savings Time Changes Overview:			
Prior DST Start:	New DST Start:	Prior DST End:	New DST End:
First Sunday of April	Second Sunday of March	Last Sunday of October	First Sunday of November
April 1, 2007	March 11, 2007	October 28, 2007	November 4, 2007

Telecommunications technology is especially sensitive to time changes and NEC Unified Solutions, Inc. (NEC) is dedicated to ensuring that the new DST date changes will be transparent to customers running supported products.

Many of the NEC products will support automatic adjustment for this daylight savings time change. Any products that do not support this automatic method will have the capability for manual adjustment.

As with any change of this nature, some product, operating system updates or programming changes may be required. Please reference the following chart to see DST support requirements for your NEC product:
